Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications)

Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications)

Taking another lesson from nature, the latest advances in image processing technology seek to combine image data from several diverse types of sensors in order to obtain a more accurate view of the scene: very much the same as we rely on our five senses. Multi-Sensor Image Fusion and Its Applications is the first text dedicated to the theory and practice of the registration and fusion of image data, covering such approaches as statistical methods, color-related techniques, model-based methods, and visual information display strategies.

After a review of state-of-the-art image fusion techniques, the book provides an overview of fusion algorithms and fusion performance evaluation. The following chapters explore recent progress and practical applications of the proposed techniques to solving problems in such areas as medical diagnosis, surveillance and biometric systems, remote sensing, nondestructive evaluation, blurred image restoration, and image quality assessment. Recognized leaders from industry and academia contribute the chapters, reflecting the latest research trends and providing useful algorithms to aid implementation.

Supplying a 28-page full-color insert, Multi-Sensor Image Fusion and Its Applications clearly demonstrates the benefits and possibilities of this revolutionary development. It provides a solid knowledge base for applying these cutting-edge techniques to new challenges and creating future advances.

From reader reviews:

Danny Exum:

This Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) are generally reliable for you who want to become a successful person, why. The key reason why of this Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) can be on the list of great books you must have is usually giving you more than just simple reading food but feed anyone with information that probably will shock your previous knowledge. This book is definitely handy, you can bring it everywhere and whenever your conditions in e-book and printed people. Beside that this Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) giving you an enormous of experience for instance rich vocabulary, giving you trial of critical thinking that we know it useful in your day pastime. So , let's have it and revel in reading.

James Jackson:

Are you kind of hectic person, only have 10 or even 15 minute in your day to upgrading your mind ability or thinking skill even analytical thinking? Then you have problem with the book when compared with can satisfy your limited time to read it because this time you only find e-book that need more time to be read. Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) can be your answer mainly because it can be read by you who have those short free time problems.

Jeffrey Blough:

Reading a book for being new life style in this calendar year; every people loves to examine a book. When you learn a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your study, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, in addition to soon. The Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) will give you new experience in examining a book.

Eileen Moore:

As we know that book is vital thing to add our knowledge for everything. By a e-book we can know everything we want. A book is a group of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This e-book Multi-Sensor Image Fusion and Its Applications (Signal Processing and Communications) was filled about science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading any book. If you know how big benefit from a book, you can experience enjoy to read a guide. In the modern era like now, many ways to get book you wanted.
