An Audio-Tutorial Introduction to Chemistry: Workbook Paul Santiago

A practical, easy-to-learn way to master the fundamentals of chemistry! The audio-tutorial approach has proven successful in many classrooms. Students work through the program's twenty-two lessons at their own pace in the classroom, library, home, and even in the car to learn some of the basic concepts in chemistry. Each lesson consists of a cassette tape, Guide Sheet, and one or more Work Sheets. The tapes lead the beginner through each lesson, explaining material and allowing them to write definitions and/or do problems as they proceed through the Guide Sheet. Each lesson presents a set of objectives. This workbook is the perfect answer for students with varying backgrounds and abilities when there is no time to meet individual needs in class. A complete set of digital audio files is available at http://www.harford.edu/faculty/PSantiag/audio_lessons.htm. For more information, contact Paul Santiago at psantiag@harford.edu.
