**Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance)** Sebastian Oberthür

This book analyses the status and prospects of the global governance of Access Benefit Sharing (ABS) in the aftermath of 2010's Nagoya Protocol to the Convention on Biological Diversity (CBD). The CBD's initial 1992 framework of global ABS governance established the objective of sharing the benefits arising from the use of genetic resources fairly between countries and communities. Since then, ABS has been a contested issue in international politics – not least due to the failure of effective implementation of the original CBD framework. The Nagoya Protocol therefore aims to improve and enhance this framework. Compared to the slow rate of progress on climate change, it has been considered a major achievement of global environmental governance, but it has also been coined a 'masterpiece of ambiguity'. This book analyses the role of a variety of actors in the emergence of the Nagoya Protocol and provides an up-to-date assessment of the core features of the architecture of global ABS governance.

This book offers a central resource regarding ABS governance for those working on and interested in global environmental governance. This is achieved by focusing on two broad themes of the wider research agenda on global environmental governance, namely architecture and agency. Furthermore, individual chapter contributions relate and link ABS governance to other prominent debates in the field, such as institutional complexes, compliance, market-based approaches, EU leadership, the role of small states, the role of non-state actors and more.

Partly due to its seeming technical complexity, ABS governance has so far not been at the centre of attention of scholars and practitioners of global environmental governance. In this book, care is taken to provide an accessible account of key functional features of the governance system which enables non-specialists to gain a grasp on the main issues involved, allowing the issue of ABS governance to move centre-stage and be more fully recognised in discussions on global environmental governance.

**From reader reviews:**

**Lucille Renner:**

Playing with family in a park, coming to see the coastal world or hanging out with close friends is thing that usually you could have done when you have spare time, then why you don't try point that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance), you can enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't obtain it, oh come on its called reading friends.

**Johnna Chapin:**

Beside this particular Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance) in your phone, it may give you a way to get more close to the new knowledge or info. The information and the knowledge you can got here is fresh from your oven so don't end up being worry if you feel like an old people live in narrow small town. It is good thing to have Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance) because this book offers to your account readable information. Do you occasionally have book but you don't get what it's facts concerning. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable arrangement here cannot be questionable, just like treasuring beautiful island. Techniques you still want to miss the item? Find this book and also read it from right now!

**Donna Valdez:**

As we know that book is significant thing to add our know-how for everything. By a book we can know everything we really wish for. A book is a set of written, printed, illustrated as well as blank sheet. Every year was exactly added. This guide Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance) was filled with regards to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading the book. If you know how big benefit of a book, you can sense enjoy to read a reserve. In the modern era like today, many ways to get book that you simply wanted.

**Donald Lee:**

As a scholar exactly feel bored to reading. If their teacher questioned them to go to the library as well as to make summary for some e-book, they are complained. Just very little students that has reading's soul or real

their pastime. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring and also can't see colorful photos on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Global Governance of Genetic Resources: Access and Benefit Sharing after the Nagoya Protocol (Routledge Research in Global Environmental Governance) can make you really feel more interested to read.
