The development of new technologies places new challenges to the interpretation and implementation of legislation in the information society. The recent deployment of service-oriented computing and cloud computing for online commercial activities has urged countries to amend existing legislation and launch new regulations. With the exponential growth of international electronic commercial transactions, a consistent global standard of regulating the legal effects of electronic communications, the protection of data privacy security and the effectiveness of Internet-related dispute resolution are motivating factors to build users' trust and confidence in conducting cross-border business and their sharing information online.

The second edition of this book continues taking a 'solutions to obstacles' approach and analyses the main legal obstacles to the establishment of trust and confidence in undertaking business online. In comparing the legislative frameworks of e-commerce in the EU, US, China and International Organisations, the book sets out solutions to modernise and harmonise laws at the national, regional and international levels in response to current technological developments. It specifically provides information on the key legal challenges caused by the increasing popularity of service-oriented computing and cloud computing as well as the growing number of cross-border transactions and its relation to data privacy protection, Internet jurisdiction, choice of law and online dispute resolution. It considers how greater legal certainty can be achieved in cloud computing service contracts and other agreements resulted in service-oriented computing.

The second edition of *Law of Electronic Commercial Transactions* is a clear and up to date account of a fast-moving area of study. It will be of great value to legislators, politicians, practitioners, scholars, businesses, individuals, postgraduate and undergraduate students. It provides in-depth research into finding solutions to remove eight generic legal obstacles in electronic commercial transactions and offers insights into policy making, law reforms, regulatory developments and self-protection awareness.
