## Bringing Knowledge Back In: From Social Constructivism to Social Realism in the Sociology of Education Michael Young

'This book tackles some of the most important educational questions of the day... It is rare to find a book on education which is theoretically sophisticated and practically relevant: this book is.' *From the Foreword by Hugh Lauder*

What is it in the twenty-first century that we want young people, and adults returning to study, to know? What is it about the kind of knowledge that people can acquire at school, college or university that distinguishes it from the knowledge that people acquire in their everyday lives everyday lives, at work, and in their families?

*Bringing Knowledge Back In* draws on recent developments in the sociology of knowledge to propose answers to these key, but often overlooked, educational questions. Michael Young traces the changes in his own thinking about the question of knowledge in education since his earlier books *Knowledge and Control* and *The Curriculum of the Future*. He argues for the continuing relevance of the writings of Durkheim and Vygotsky and the unique importance of Basil Bernstein's often under-appreciated work. He illustrates the importance of questions about knowledge by investigating the dilemmas faced by researchers and policy makers in a range of fields. He also considers the broader issue of the role of sociologists in relation to educational policy in the context of increasingly interventionist governments. In so doing, the book:

- provides conceptual tools for people to think and debate about knowledge and education in new ways
- provides clear expositions of difficult ideas at the interface of epistemology and the sociology of knowledge
- makes explicit links between theoretical issues and practical /policy questions
- offers a clear focus for the future development of the sociology of education as a key field within educational studies.

This compelling and provocative book will be essential reading for anyone involved in research and debates about the curriculum as well as those with a specific interest in the sociology of education.

#### **James Ojeda:**

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some reserve, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that reading through is not important, boring

in addition to can't see colorful photos on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Bringing Knowledge Back In: From Social Constructivism to Social Realism in the Sociology of Education can make you really feel more interested to read.
