Felix R. FitzRoy, Elissaios Papyrakis

An Introduction to Climate Change Economics and Policy (Routledge Textbooks in Environmental and Agricultural Economics) Felix R. FitzRoy, Elissaios Papyrakis

The 2nd edition of *An Introduction to Climate Change Economics and Policy* explains the key scientific, economic and policy issues related to climate change in a completely up-to-date introduction for anyone interested, and students at all levels in various related courses, including environmental economics, international development, geography, politics and international relations.

FitzRoy and Papyrakis highlight how economists and policymakers often misunderstand the science of climate change, underestimate the growing threat to future civilization and survival and exaggerate the costs of radical measures needed to stabilize the climate. In contrast, they show how direct and indirect costs of fossil fuels – particularly the huge health costs of local pollution – actually exceed the investment needed for transition to an almost zero carbon economy in two or three decades using available technology.
