## **Environmentally Benign Approaches for Pulp Bleaching (Developments in Environmental Management)** Pratima Bajpai, P. Bajpai

Pulp and paper production has increased globally and will continue to increase in the near future.

Approximately 155 millions tons of wood pulp is produced worldwide and about 260 millions is projected for 2010. To cope with the increasing demand, an increase in production and improved environmental performance is needed as the industry is under constant pressure to reduce environmental emissions to air and water. This book gives updated information on environmentally benign approaches for pulp bleaching, which can help solve the problems associated with conventional bleaching technologies.

\* Main focus is on the environmentally friendly technologies that can help solve some of the problems associated with conventional bleaching technologies

\* Information given is up-to-date, authoritative and cites the experiences of many mills and pertinent research, which is of interest to those working in the industry or intending to do so

\* Covers in great depth all the aspects of various bleaching processes including environmental issues
