Basic Methods in Molecular Biology

Leonard Davis

Basic Methods in Molecular Biology Leonard Davis

Basic Methods in Molecular Biology discusses the heart of the most recent revolution in biology-the development of the technology of genetics. The achievements in this field have simply changed what biologists do and, perhaps even more important, the way they think. Moreover, never before have scientists from such a broad range of disciplines rushed into such a small and slightly arcane field to learn and carry off a bit of the technology.

This book comprises 21 chapters, opening with three introductory ones that discuss the basics of molecular biology; the tools of the molecular biologist; and general preparations, procedures, and considerations for use of the book. The following chapters then discuss cloning vectors and bacterial cells; preparation of DNA from eukaryotic cells; probing nucleic acids; plasmid DNA preparation; DNA restriction fragment preparation; purification of DNA; and preparation and analysis of RNA from eukaryotic cells. Other chapters cover preparation of DNA from bacteriophage clones; cloning DNA from the eukaryotic genome; subcloning into plasmids; M13 cloning and sequencing; further characterization of cloned DNA; transfection of mammalian cells in culture; protein methods; general methods; and specialized methods.

This book will be of interest to practitioners in the fields of biology and molecular genetics.

From reader reviews:

Omar Hinojosa:

Reading can called mind hangout, why? Because if you find yourself reading a book particularly book entitled Basic Methods in Molecular Biology the mind will drift away trough every dimension, wandering in each and every aspect that maybe not known for but surely can be your mind friends. Imaging every word written in a e-book then become one type conclusion and explanation that maybe you never get before. The Basic Methods in Molecular Biology giving you another experience more than blown away your thoughts but also giving you useful facts for your better life in this era. So now let us demonstrate the relaxing pattern is your body and mind are going to be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary investing spare time activity?

Nichelle Shive:

Are you kind of occupied person, only have 10 or 15 minute in your day to upgrading your mind ability or thinking skill even analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because this time you only find reserve that need more time to be go through. Basic Methods in Molecular Biology can be your answer mainly because it can be read by an individual who have those short free time problems.

Robert Olsen:

In this period of time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The particular book that recommended to you personally is Basic Methods in Molecular Biology this reserve consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The language styles that writer use for explain it is easy to understand. The actual writer made some study when he makes this book. This is why this book ideal all of you.

Millie Goodman:

That reserve can make you to feel relax. This specific book Basic Methods in Molecular Biology was colourful and of course has pictures around. As we know that book Basic Methods in Molecular Biology has many kinds or category. Start from kids until teens. For example Naruto or Investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book are usually make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading in which.
