**Cases in Finance** Jr., Ben H. Nunnally, Anthony D Plath

CASES PROBLEMS IN FINANCE, 2e is designed to be used in conjunction with a standard introductory financial management textbook or as the foundation for an introductory case course. The cases may also be used as reinforcement of theory in an intermediate finance course. The purpose of the casebook is to reinforce and expand upon the theoretical material learned in the introductory undergraduate business finance course. The cases are concise directed and designed to generate discussion, focusing upon three elements: industry and company setting; the underlying financial theory; and the particular decision at hand, giving students the opportunity to make decisions based on situations that closely replicate decisions faced by practicing managers. The cases are considered directed because end-of-case questions are included that highlight the major decision points that need to be addressed, helping students come to a final business decision.
