Artem Saakian

Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) Artem Saakian

Written for professional engineers and students who specialize in antenna, communication and radar systems, this authoritative book provides a thorough introduction to the basic principles of electromagnetic wave propagation of radio frequencies in real-world conditions. It serves as an invaluable daily reference for practitioners in the field and also as a complete, organized text on the subject. This comprehensive resource covers a wide range of essential topics, from the classification of radio waves, electromagnetic wave theory, and antennas for RF radio links... to the impact of the earth surface on the propagation of ground waves, atmospheric affects in radio wave propagation, and radio wave reception. The book is packed with over 1,105 time-saving equations and key discussions are supported with more than 190 illustrations. Moreover, each chapter includes problem sets to test the reader's mastery of the material.

From reader reviews:

Stacee Stern:

The book Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library)? A number of you have a different opinion about book. But one aim this book can give many data for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or information that you take for that, you could give for each other; it is possible to share all of these. Book Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) has simple shape but you know: it has great and massive function for you. You can appearance the enormous world by wide open and read a guide. So it is very wonderful.

Carlos Reese:

As people who live in often the modest era should be upgrade about what going on or facts even knowledge to make these keep up with the era that is always change and advance. Some of you maybe will certainly update themselves by reading books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and want in this era.

Gregory Phipps:

Reading a reserve can be one of a lot of activity that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people like it. First reading a book will give you a lot of new facts. When you read a publication you will get new information mainly because book is one of many ways to share the information or perhaps their idea. Second, looking at a book will make an individual more imaginative. When you studying a book especially tale fantasy book the author will bring that you imagine the story how the characters do it anything. Third, you may share your knowledge to other people. When you read this Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library), you could tells your family, friends and soon about yours book. Your knowledge can inspire average, make them reading a guide.

Della Francis:

Do you like reading a book? Confuse to looking for your favorite book? Or your book was rare? Why so many concern for the book? But almost any people feel that they enjoy intended for reading. Some people likes reading, not only science book but also novel and Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) or others sources were given know-how for you. After you know how the great a book, you feel need to read more and more. Science reserve was created for teacher or students

especially. Those guides are helping them to add their knowledge. In additional case, beside science e-book, any other book likes Radio Wave Propagation Fundamentals (Artech House Remote Sensing Library) to make your spare time a lot more colorful. Many types of book like this one.
