Cremona Groups and the Icosahedron focuses on the Cremona groups of ranks 2 and 3 and describes the beautiful appearances of the icosahedral group A_5 in them. The book surveys known facts about surfaces with an action of A_5 , explores A_5 -equivariant geometry of the quintic del Pezzo threefold V_5 , and gives a proof of its A_5 -birational rigidity.

The authors explicitly describe many interesting A_5 -invariant subvarieties of V_5 , including A_5 -orbits, low-degree curves, invariant anticanonical $K3$ surfaces, and a mildly singular surface of general type that is a degree five cover of the diagonal Clebsch cubic surface. They also present two birational selfmaps of V_5 that commute with A_5 -action and use them to determine the whole group of A_5 -birational automorphisms. As a result of this study, they produce three non-conjugate icosahedral subgroups in the Cremona group of rank 3, one of them arising from the threefold V_5 .

This book presents up-to-date tools for studying birational geometry of higher-dimensional varieties. In particular, it provides readers with a deep understanding of the biregular and birational geometry of V_5 .

From reader reviews:

Anna Harlow:

The book Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics) can give more knowledge and also the precise product information about everything you want. Why then must we leave a very important thing like a book Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics)? A number of you have a different opinion about publication. But one aim that book can give many data for us. It is absolutely appropriate. Right now, try to closer using your book. Knowledge or details that you take for that, you could give for each other; you could share all of these. Book Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics) has simple shape nevertheless, you know: it has great and big function for you. You can search the enormous world by open and read a publication. So it is very wonderful.

Lea Severino:

As people who live in typically the modest era should be revise about what going on or data even knowledge to make these individuals keep up with the era which is always change and move forward. Some of you maybe can update themselves by looking at books. It is a good choice in your case but the problems coming to you is you don't know what kind you should start with. This Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

James Fox:

Would you one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you just dont know the inside because don't evaluate book by its include may doesn't work the following is difficult job because you are frightened that the inside maybe not while fantastic as in the outside appear likes. Maybe you answer can be Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics) why because the amazing cover that make you consider about the content will not disappoint an individual. The inside or content is fantastic as the outside as well as cover. Your reading sixth sense will directly assist you to pick up this book.

Felix Smith:

E-book is one of source of knowledge. We can add our know-how from it. Not only for students but in addition native or citizen need book to know the change information of year to be able to year. As we know those ebooks have many advantages. Beside we all add our knowledge, could also bring us to around the world. By the book Cremona Groups and the Icosahedron (Monographs and Research Notes in Mathematics) we can consider more advantage. Don't you to definitely be creative people? To be creative person must choose to read a book. Just simply choose the best book that suitable with your aim. Don't become doubt to change your life by this book Cremona Groups and the Icosahedron (Monographs and Research Notes in

Mathematics). You can more inviting than now.
