*Social Policy and Change in East Asia* is a collection of essays from a group of indigenous East Asian social policy researchers who met bi-annually to discuss social development issues. The book's focus is the policy responses of respective East Asian government since the 2008 financial tsunami struck the region. Together, the essays in *Social Policy and Change in East Asia* argue that traditional social policy approach has failed to account for the problem of economic volatility and to devise policy measures that can promote long-term stability. Avoiding a static and Eurocentric approach, the authors of this book seek to unravel the meaning of the social development approach in various policy contexts. This book supports a dynamic understanding of social policy formulation that does not neglect the problem of economic turbulence in policy and planning.
