A.L. Fradkov, I.V. Miroshnik, V.O. Nikiforov

Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) A.L.

Fradkov, I.V. Miroshnik, V.O. Nikiforov

This volume presents a theoretical framework and control methodology for a class of complex dynamical systems characterised by high state space dimension, multiple inputs and outputs, significant nonlinearity, parametric uncertainty, and unmodeled dynamics. A unique feature of the authors' approach is the combination of rigorous concepts and methods of nonlinear control (invariant and attracting submanifolds, Lyapunov functions,

exact linearisation, passification) with approximate decomposition results based on singular perturbations and decentralisation. Some results published previously in the Russian literature and not well known in the West are

brought to light. Basic concepts of modern nonlinear control and motivating examples are given.

Audience: This book will be useful for researchers, engineers, university lecturers and postgraduate students specialising in the fields of applied mathematics and engineering, such as automatic control, robotics, and control of vibrations.

From reader reviews:

Janice Wilham:

The book Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) can give more knowledge and also the precise product information about everything you want. So why must we leave a good thing like a book Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications)? Some of you have a different opinion about reserve. But one aim in which book can give many data for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or info that you take for that, you can give for each other; you can share all of these. Book Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) has simple shape but you know: it has great and big function for you. You can seem the enormous world by wide open and read a guide. So it is very wonderful.

Samuel Brown:

This book untitled Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) to be one of several books this best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit into it. You will easily to buy this book in the book retailer or you can order it through online. The publisher with this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smart phone. So there is no reason to your account to past this book from your list.

Ellen McNulty:

Your reading sixth sense will not betray anyone, why because this Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) book written by well-known writer whose to say well how to make book that can be understand by anyone who also read the book. Written throughout good manner for you, leaking every ideas and creating skill only for eliminate your current hunger then you still doubt Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) as good book not just by the cover but also by the content. This is one publication that can break don't judge book by its cover, so do you still needing yet another sixth sense to pick this specific!? Oh come on your studying sixth sense already told you so why you have to listening to yet another sixth sense.

Brandi Johnson:

In this time globalization it is important to someone to find information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that will print many kinds of book. The book that recommended for your requirements is Nonlinear and Adaptive Control of Complex Systems (Mathematics and Its Applications) this book consist a lot of the information from the condition of this world now. This specific book was represented how do the world has grown up. The vocabulary styles that writer require to

explain it is easy to understand. The actual writer made some analysis when he makes this book. Honestly, that is why this book suitable all of you.
