Questionnaires in Second Language Research: Construction, Administration, and Processing (Second Language Acquisition Research Series) Zoltán Dörnyei, Tatsuya Taguchi

Questionnaires in Second Language Research: Construction, Administration, and Processing is the first guide in the second language field devoted to the question of how to produce and use questionnaires as reliable and valid research instruments. It offers a thorough overview of the theory of questionnaire design, administration, and processing, made accessible by concrete, real-life second language research applications. This Second Edition features a new chapter on how an actual scientific instrument was developed using the theoretical guidelines in the book, and new sections on translating questionnaires and collecting survey data on the Internet. Researchers and students in second language studies, applied linguistics, and TESOL programs will find this book invaluable, and it can also be used as a textbook for courses in quantitative research methodology and survey research in linguistics, psychology, and education departments.
