# Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics

*Javad Dargahi, Saeed Sokhanvar, Siamak Najarian, Siamak Arbatani*

**Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics** Javad Dargahi, Saeed Sokhanvar, Siamak Najarian, Siamak Arbatani

**Comprehensively covers the key technologies for the development of tactile perception in minimally invasive surgery**

Covering the timely topic of tactile sensing and display in minimally invasive and robotic surgery, this book comprehensively explores new techniques which could dramatically reduce the need for invasive procedures. The tools currently used in minimally invasive surgery (MIS) lack any sort of tactile sensing, significantly reducing the performance of these types of procedures. This book systematically explains the various technologies which the most prominent researchers have proposed to overcome the problem. Furthermore, the authors put forward their own findings, which have been published in recent patents and patent applications. These solutions offer original and creative means of surmounting the current drawbacks of MIS and robotic surgery.

## **Key features:-**

- Comprehensively covers topics of this ground-breaking technology including tactile sensing, force sensing, tactile display, PVDF fundamentals
- Describes the mechanisms, methods and sensors that measure and display kinaesthetic and tactile data between a surgical tool and tissue
- Written by authors at the cutting-edge of research into the area of tactile perception in minimally invasive surgery
- Provides key topic for academic researchers, graduate students as well as professionals working in the area

### **From reader reviews:**

#### **Nancy Jackson:**

What do you consider book? It is just for students since they're still students or this for all people in the world, exactly what the best subject for that? Only you can be answered for that question above. Every person has diverse personality and hobby for each and every other. Don't to be pushed someone or something that they don't wish do that. You must know how great in addition to important the book Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics. All type of book can you see on many methods. You can look for the internet resources or other social media.

#### **Jack Scala:**

The experience that you get from Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics could be the more deep you searching the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to comprehend but Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics giving you thrill feeling of reading. The article author conveys their point in certain way that can be understood simply by anyone who read this because the author of this e-book is well-known enough. This book also makes your personal vocabulary increase well. Making it easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this specific Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics instantly.

#### **Harry Anderson:**

You are able to spend your free time to see this book this reserve. This Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics is simple to deliver you can read it in the recreation area, in the beach, train as well as soon. If you did not have got much space to bring the printed book, you can buy typically the e-book. It is make you quicker to read it. You can save typically the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

#### **Michael Kenney:**

Don't be worry when you are afraid that this book may filled the space in your house, you will get it in e-book way, more simple and reachable. That Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics can give you a lot of pals because by you considering this one book you have matter that they don't and make a person more like an interesting person. This kind of book can be one of a step for you to get success. This reserve offer you information that maybe your friend doesn't realize, by knowing more than other make you to be great individuals. So , why hesitate? Let me have Tactile Sensing and Display: Haptic Feedback For Minimally Invasive Surgery And Robotics.
