The calcitonin gene-related peptide family: form, function and future perspectives

The calcitonin gene-related peptide family: form, function and future perspectives

In 1925, J. B. Collip (1925) reported that extracts of parathyroid gland contained an activity that raised calcium levels in the blood of parathyroidectomized animals, and suggested that this was due to a hormone produced in the parathyroid gland. The story of parathyroid hormone discovery was indicative of ever-increasing sophistication in sample preparation and protein isolation techniques. This paper resolved earlier controversies over the function of the parathyroid glands and control of blood calcium. The year 1961 was a banner year for parathyroid research, in which the peptides parathyroid hormone and calcitonin were purified, and in which it was suggested that calcitonin could lower blood calcium (Copp and Cameron 1961). In 1982 it was discovered that in neurons the primary RNA transcript for calcitonin could be alternatively-spliced to give calcitonin gene-related peptide (CGRP), and shortly thereafter amylin (previously named islet amyloid polypeptide, IAPP) was identified and shown to have homology to CGRP. Since then a and b CGRP have been delineated and adrenomedullin and intermedin discovered, and this family of homologous peptides has emerged. This family of peptide hormones has a diverse and constantly expanding range of important physiologic functions, including regulation of blood calcium, vascular tension, feeding behavior and pain recognition.

From reader reviews:

Brandi Anderson:

Within other case, little persons like to read book The calcitonin gene-related peptide family: form, function and future perspectives. You can choose the best book if you want reading a book. So long as we know about how is important a new book The calcitonin gene-related peptide family: form, function and future perspectives. You can add know-how and of course you can around the world by a book. Absolutely right, mainly because from book you can realize everything! From your country until foreign or abroad you can be known. About simple issue until wonderful thing it is possible to know that. In this era, we are able to open a book as well as searching by internet unit. It is called e-book. You may use it when you feel uninterested to go to the library. Let's go through.

Julio Yates:

This book untitled The calcitonin gene-related peptide family: form, function and future perspectives to be one of several books which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit in it. You will easily to buy this particular book in the book store or you can order it by using online. The publisher with this book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Touch screen phone. So there is no reason for your requirements to past this publication from your list.

Melvin Groth:

A lot of people always spent all their free time to vacation as well as go to the outside with them family or their friend. Do you know? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity this is look different you can read any book. It is really fun for yourself. If you enjoy the book that you read you can spent the whole day to reading a e-book. The book The calcitonin gene-related peptide family: form, function and future perspectives it is quite good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. If you did not have enough space to create this book you can buy the particular e-book. You can m0ore simply to read this book from the smart phone. The price is not to fund but this book provides high quality.

Lucille Grant:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you could have done when you have spare time, and then why you don't try thing that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love The calcitonin gene-related peptide family: form, function and future perspectives, it is possible to enjoy both. It is great combination right, you still would like to miss it? What kind of hang-out type is it? Oh can happen its mind hangout folks. What? Still

don't buy it, oh come on its known as reading friends.
