Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies)

Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies)

Due to the wide application of magnesium alloys in metals manufacturing, it is very important to employ a reliable method of joining these reactive metals together and to other alloys. Welding and joining of magnesium alloys provides a detailed review of both established and new techniques for magnesium alloy welding and their characteristics, limitations and applications.

Part one covers general issues in magnesium welding and joining, such as welding materials, metallurgy and the joining of magnesium alloys to other metals such as aluminium and steel. The corrosion and protection of magnesium alloy welds are also discussed. In part two particular welding and joining techniques are reviewed, with chapters covering such topics as inert gas welding, metal inert gas welding and laser welding, as well as soldering, mechanical joining and adhesive bonding. The application of newer techniques to magnesium alloys, such as hybrid laser-arc welding, activating flux tungsten inert gas welding and friction stir, is also discussed.

With its distinguished editor and expert team of contributors, Welding and joining of magnesium alloys is a comprehensive reference for producers of primary magnesium and those using magnesium alloys in the welding, automotive and other such industries, as well as academic researchers in metallurgy and materials science.

- Provides a detailed review of both established and new techniques for magnesium alloys welding and their characteristics, limitations and applications
- Both the weldability of magnesium alloys and weldability to other metals is assessed as well as the preparation required for welding featuring surface treatment
- Particular welding and joining technologies are explored in detail with particular chapters examining hybrid laser-arc welding, laser welding and resistance spot welding

From reader reviews:

Alicia Wescott:

What do you ponder on book? It is just for students because they're still students or that for all people in the world, the particular best subject for that? Merely you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't wish do that. You must know how great along with important the book Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies). All type of book could you see on many methods. You can look for the internet sources or other social media.

William Nelson:

Book is to be different for every single grade. Book for children until adult are different content. As we know that book is very important for people. The book Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies) seemed to be making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The publication Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies) is not only giving you a lot more new information but also to become your friend when you sense bored. You can spend your spend time to read your publication. Try to make relationship with the book Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies). You never feel lose out for everything in case you read some books.

Patti Wooden:

Spent a free a chance to be fun activity to do! A lot of people spent their down time with their family, or all their friends. Usually they accomplishing activity like watching television, about to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could be reading a book is usually option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to attempt look for book, may be the guide untitled Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies) can be excellent book to read. May be it may be best activity to you.

Bruce Davis:

That publication can make you to feel relax. This book Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies) was vibrant and of course has pictures around. As we know that book Welding and Joining of Magnesium Alloys (Woodhead Publishing Series in Welding and Other Joining Technologies) has many kinds or type. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe that you are the character on there.

Therefore not at all of book are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book in your case and try to like reading in which.
