**Advances in aquaculture hatchery technology: 7. Management of finfish and shellfish larval health in aquaculture hatcheries (Woodhead Publishing Series in Food Science, Technology and Nutrition)** T.J. Bowden, I.R. Bricknell

This chapter looks at the issues surrounding health of finfish and shellfish larvae in the aquaculture environment. The chapter will examine issues such as biosecurity to see how it forms the cornerstone of effective hatchery management and how problems can arise when biosecurity fails. Then the chapter looks at how the health of the larvae can be manipulated and how the larvae can be protected from potential pathogens by good management.
