Neuroscience for Social Work: Current Research and Practice Holly Matto PhD

This clear and accessible guide—written by social workers for social workers—describes the most current developments in neuroscience and their practical applications for social work in education, child welfare, health, mental health, and criminal justice settings. The contributions of social work experts in these key areas of practice make this vast and ever-expanding body of neuroscientific knowledge easily understandable, with specific relevance to understanding the impact of the environment on neural mechanisms and human life course trajectories.

The text examines how neuroimaging can be used to examine psychosocial treatment efficacy, discusses cross-system programmatic and policy implications that respond to the way in which toxic environments and early disrupted attachment affect brain and behavior, and addresses the importance of bioethics to inform the integration of neuroscience into social work practice.

This is the only text on this topic with chapters organized around five practice settings and embedded with application skills across micro, mezzo, and macro levels. Each chapter includes an overview of the latest scientific research pertaining to the topic and discusses implications for assessment, prevention, intervention, policy, research, and ethics. Real-world case studies in each chapter enhance practice applications.

Key Features:

- Describes the latest applications of neuroscience across social work settings in education, child welfare, health, mental health, and criminal justice
- Examines latest neuroscientific research for each topic and its implications for assessment, prevention, intervention, policy issues, research, and ethical/legal issues
- Draws clear practical implications in each chapter
- Written by social workers for social workers
- Includes the contributions of noted social work researchers, faculty, and practitioners

From reader reviews:

Tyler Emery:

What do you in relation to book? It is not important with you? Or just adding material when you require something to explain what yours problem? How about your time? Or are you busy particular person? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? Every individual has many questions above. They need to answer that question due to the fact just their can do that will. It said that about publication. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this specific Neuroscience for Social Work: Current Research and Practice to read.

Jacqueline Lewis:

In this 21st centuries, people become competitive in each and every way. By being competitive now, people have do something to make these people survives, being in the middle of the crowded place and notice by means of surrounding. One thing that at times many people have underestimated the item for a while is reading. Yep, by reading a e-book your ability to survive improve then having chance to stay than other is high. For you personally who want to start reading a book, we give you this specific Neuroscience for Social Work: Current Research and Practice book as starter and daily reading book. Why, because this book is greater than just a book.

Joseph Langley:

Reading a guide tends to be new life style with this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Along with book everyone in this world can share their idea. Books can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors these days always try to improve their expertise in writing, they also doing some research before they write on their book. One of them is this Neuroscience for Social Work: Current Research and Practice.

Rebbeca Farley:

The reason? Because this Neuroscience for Social Work: Current Research and Practice is an unordinary book that the inside of the publication waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book alongside it was fantastic author who also write the book in such awesome way makes the content inside easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of benefits than the other book include such as help improving your expertise and your critical thinking means. So , still want to hold up having that book? If I ended up you I will go to

the book store hurriedly.
