The Tank Factory: British Military Vehicle Development and the Chobham Establishment William Suttie

The United Kingdom invented the tank and was responsible for campaign-winning tactics, yet by the start of the Second World War had fallen well behind other nations in the design and build of armoured vehicles. William Suttie tells the history of tank design from a government perspective and the decisions and failures that led to that state of affairs, going on to detail the formation of the Fighting Vehicles Research and Development Establishment at Chertsey. This fascinating book reveals that establishment's history, its ground breaking research, inventions and designs and many stories of the people who worked there, and its aim to ensure that the British Army would never be under protected or outgunning again.
