**Swarm Intelligence and Bio-Inspired Computation: 12. Bio-Inspired Models for Semantic Web** Priti Srinivas Sajja, Rajendra Akerkar

Bio-inspired models have taken inspiration from the nature to solve challenging problems in an intelligent manner. Major aims of such bio-inspired models of computation are to propose new unconventional computing architectures and novel problem solving paradigms. Computing models such as artificial neural network (ANN), genetic algorithm (GA), and swarm intelligence (SI) are major constituent models of the bio-inspired approach. Applications of these models are ubiquitous and hence proposed to be applied for Semantic Web. The chapter discusses fundamentals of these bio-inspired constituents along with some heuristic that can be used to design and implement these constituents and briefly surveys recent applications of these models for the Semantic Web. The study shows that the objective of the Semantic Web is better met with such approach and the Web can be accessed in more human-oriented way. At the end, a generic framework for web content filtering based on neuro-fuzzy approach is presented. By considering online webpages and fuzzy user profile, the proposed system classifies the webpages into vague categories using a neural network.

### **From reader reviews:**

#### **Rudy Nixon:**

In this 21st hundred years, people become competitive in each and every way. By being competitive right now, people have do something to make them survives, being in the middle of the particular crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Sure, by reading a book your ability to survive enhance then having chance to stand up than other is high. To suit your needs who want to start reading any book, we give you this Swarm Intelligence and Bio-Inspired Computation: 12. Bio-Inspired Models for Semantic Web book as beginning and daily reading guide. Why, because this book is more than just a book.

#### **Erin Kizer:**

Spent a free time for you to be fun activity to complete! A lot of people spent their down time with their family, or their own friends. Usually they undertaking activity like watching television, going to beach, or picnic inside the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Could possibly be reading a book might be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to try out look for book, may be the publication untitled Swarm Intelligence and Bio-Inspired Computation: 12. Bio-Inspired Models for Semantic Web can be good book to read. May be it might be best activity to you.

#### **Dave Arreola:**

In this age globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. Often the book that recommended for you is Swarm Intelligence and Bio-Inspired Computation: 12. Bio-Inspired Models for Semantic Web this e-book consist a lot of the information with the condition of this world now. This book was represented how can the world has grown up. The dialect styles that writer use to explain it is easy to understand. The actual writer made some analysis when he makes this book. Here is why this book suitable all of you.

#### **Ricardo Hempel:**

What is your hobby? Have you heard that will question when you got pupils? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And you also know that little person just like reading or as studying become their hobby. You need to know that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your own teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can

you choose to adopt be your object. One of them are these claims Swarm Intelligence and Bio-Inspired Computation: 12. Bio-Inspired Models for Semantic Web.
