### **The Structural Basis of Membrane Function (Series of IUB-sponsored symposia ; no. 72)**

The Structural Basis of Membrane Function is a documentation of an international symposium of the same title. This book serves as a collection of the significant articles pertaining to the field of membrane research. It is composed of seven parts, where the first and last parts are articles contributed by scientific authorities. The book generally discusses the membrane research and this study's relevance to the society. Then, the book specifically looks into membrane features, including its structure, processes in it, functions, and types. Some of the specific topics included in the discussion of each part are phospholipases and monolayers used in studies of membrane structure; molecular aspects of active transport; and electron-transfer in energy-transducing membranes. The book also explains the two functions in common of biological membranes; synaptic receptor proteins; and liver microsomal membranes. The scope of this book is broad and helpful to many fields of science. It will be of great benefit to students, teachers, scientists, and researchers in the field of biochemistry, biology, molecular biology, chemistry, pharmacology, and cellular biology among others.
