In this groundbreaking new edition, Mendelsohn gives you the weapon to conquer the limitations of traditional technical trading-intermarket analysis.

To compete in today's rapidly changing economy, you need a method that can identify reoccurring patterns within individual financial markets and between related global markets. You need tools that lead, not lag.

Step by step, Mendelsohn shows how combining technical, fundamental, and intermarket analysis into one powerful framework can give you an early edge to accurately forecasting trends.

Inside, you'll discover:

- Precise trading strategies that can be used by both day traders and position traders.
- The limitations of traditional technical analysis methods-and how to overcome them.
- How neural network computational modeling can create leading, not lagging, moving averages for more accurate forecasting.
- Innovative, quantitative trend forecasting indicators at the cutting edge of market analysis.

PLUS-an introduction to VantagePoint Software, which makes Mendelsohn's "new economy" trading methods work simply-and effectively. This software applies the pattern recognition capabilities of advanced neural networks to analyze intermarket data on literally hundreds of global financial markets each day.
