Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability)

Hans van Houwelingen, Hein Putter

Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) Hans van Houwelingen, Hein Putter

There is a huge amount of literature on statistical models for the prediction of survival after diagnosis of a wide range of diseases like cancer, cardiovascular disease, and chronic kidney disease. Current practice is to use prediction models based on the Cox proportional hazards model and to present those as static models for remaining lifetime after diagnosis or treatment. In contrast, **Dynamic Prediction in Clinical Survival Analysis** focuses on dynamic models for the remaining lifetime at later points in time, for instance using landmark models.

Designed to be useful to applied statisticians and clinical epidemiologists, each chapter in the book has a practical focus on the issues of working with real life data. Chapters conclude with additional material either on the interpretation of the models, alternative models, or theoretical background. The book consists of four parts:

- *Part I* deals with prognostic models for survival data using (clinical) information available at baseline, based on the Cox model
- *Part II* is about prognostic models for survival data using (clinical) information available at baseline, when the proportional hazards assumption of the Cox model is violated
- *Part III* is dedicated to the use of time-dependent information in dynamic prediction
- *Part IV* explores dynamic prediction models for survival data using genomic data

Dynamic Prediction in Clinical Survival Analysis summarizes cutting-edge research on the dynamic use of predictive models with traditional and new approaches. Aimed at applied statisticians who actively analyze clinical data in collaboration with clinicians, the analyses of the different data sets throughout the book demonstrate how predictive models can be obtained from proper data sets.

From reader reviews:

Bill Bobby:

In other case, little persons like to read book Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). You can choose the best book if you'd prefer reading a book. Given that we know about how is important a book Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability). You can add expertise and of course you can around the world by way of a book. Absolutely right, because from book you can understand everything! From your country until foreign or abroad you can be known. About simple factor until wonderful thing you could know that. In this era, we can open a book or searching by internet product. It is called e-book. You can use it when you feel uninterested to go to the library. Let's go through.

Frank Barcomb:

Now a day folks who Living in the era wherever everything reachable by connect to the internet and the resources included can be true or not involve people to be aware of each data they get. How individuals to be smart in getting any information nowadays? Of course the correct answer is reading a book. Looking at a book can help individuals out of this uncertainty Information specifically this Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) book because book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Gary Johnson:

Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) can be one of your beginner books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but delivering the information. The author giving his/her effort to put every word into satisfaction arrangement in writing Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on Statistics & Applied Probability) nevertheless doesn't forget the main level, giving the reader the hottest as well as based confirm resource data that maybe you can be certainly one of it. This great information can drawn you into fresh stage of crucial considering.

Robert King:

Reading a guide make you to get more knowledge from that. You can take knowledge and information coming from a book. Book is published or printed or highlighted from each source this filled update of news. On this modern era like at this point, many ways to get information are available for anyone. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just looking for the Dynamic Prediction in Clinical Survival Analysis (Chapman & Hall/CRC Monographs on

Statistics & Applied Probability) when you desired it?
